

# Cumberland PRODUCTS

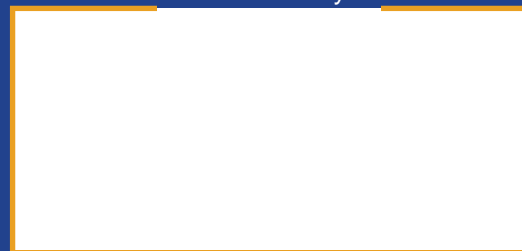

Cumberland Products is a manufacturer of specialty custom products for the utility industry. There is a true customization to our work, because many of our products are a direct result of fulfilling requests from utilities across the country. We offer a variety of tools, fabricated steel products, and plastic molded parts. Our products are available through stocking distributors throughout North America or by contacting us directly.

# Cumberland TOOLS

*Tools to make your job easier and safer*

Manufactured to respond to the needs of utility technicians and field experts.

### EZ Jack Plunger

Plungers are available in multiple handle and rod options to meet your ground probing need. The plungers have a 52" probe depth, and come with an oversized tip to make the bar retraction easier.

Part Number	Description
EZ1005	Heavy Duty - Ergo Handle, Steel Rod (weighs 17.5 lbs.)
EZ1006	Heavy Duty - Standard Handle, Steel Rod (weighs 15 lbs.)
EZ1004	Utility - Ergo Handle, Steel Rod (weighs 13 lbs.)
EZ1004-F	Utility - Ergo Handle, Fiberglass Rod

Heavy Duty with Standard Handle

### EZ T-Probe

Ideal for locating underground valve boxes, buried conduit, cables, and pipes. This mechanically assisted t-probe is available in either a steel rod or fiberglass version with reinforced steel tip. Tool length 48".

Part Number	Description
EZT1000	Steel Rod with T-handle
EZT1000F	Fiberglass Rod with T-handle

Fiberglass Rod with Steel Tip

Steel Rod with Steel Tip

### EZ Ground Rod

The mechanically enhanced ground rod probe penetrates hard soils and even frozen ground. Ideal for pipe and cable locating or grounding your tools. Comes complete with stop plate at 11-1/2" to prevent over penetration. Tool length 25".

Part Number	Description
EZG1001	Steel Rod with Stop Plate

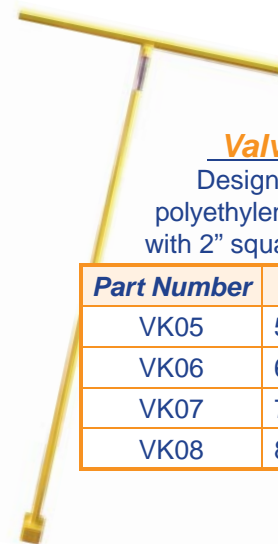

### Pipe Wrench Assist

Add safety and injury protection to your job with an anti-slip handle in either padded or knurled. The aluminum design will yield if overstressed, and is safely secured to the wrench with a D-ring. Fits most pipe and crescent wrenches.

Wrench Size	Padded Handle Part Number	Knurled Handle Part Number
14"	PWA14	PWA14KE
18"	PWA18	PWA18KE
24"	PWA24	PWA24KE
36"	PWA36	PWA36KE
48"	PWA48	PWA48KE

\* wrench not included

### Valve Key Wrench

Designed to operate both polyethylene and steel valves with 2" square operating nuts.

Part Number	Description
VK05	5' Wrench Length
VK06	6' Wrench Length
VK07	7' Wrench Length
VK08	8' Wrench Length

Pulling Plug  
Pulling Head  
Weak Link  
Mud Plug

### Pulling Plug / Pulling Head / Weak Link / Mud Plug

Used together or separately, these products help protect pipe during installation. The Pulling Plug provides an oversized hole for optimized utility installation while the Pulling Head fuses directly to the pipe and leads the new polyethylene pipe through the trench or bore. The Weak Link is designed to yield before reaching the pipe's standard safe pull strength to protect the pipe from overload while the Mud Plug will keep debris out of the pipe during pull back if the Weak Link is compromised.

Pipe Size	Pulling Plug Part Number	Pulling Head Part Number	Weak Link Part Number	Mud Plug Part Number
1/2" CTS	-	JP050-2406	WL050-2406	MP050-3408
3/4" IPS	-	JP250-2406	WL250-2406	MP250-3408
1" CTS	-	JP330C-2406	WL330C-2406	MP330C-3408
1" IPS	-	JP330I-2406	WL330I-2406	MP330I-3408
1-1/4" IPS	PP420	JP420-2406	WL420-2406	MP420-3408
2" IPS	PP550	JP550-2406	WL550-2406	MP550-3408
3" IPS	PP650	JP650-2406	WL650-2406	MP650-3408
4" IPS	PP740	JP740-2406	WL740-2406	MP740-3408
6" IPS	PP744	JP744-2406	WL744-2406	MP744-3408
8" IPS	PP746	JP746-2406	WL746-2406	MP746-3408
10" IPS	PP748	JP748-2406	WL748-2406	MP748-3408
12" IPS	PP750	JP750-2406	WL750-2406	MP750-3408

### Cumberland Purge / Test Fitting

The fitting is designed for high volume quick and easy air pressure testing of polyethylene pipe. It is reusable and can be configured for different size PE using simple fusion reducers.

Part Number	Description
TH550-2406	2" HV Test Head with 3/4" NPT Tap

### Gas Tornado

Using the Venturi effect, the Gas Tornado aggressively suctions gas from the ground.

Part Number	Description
T95993UNIT	Complete Unit (includes power head and lower unit)
T95993	Power Head Only
T95993LU	Lower Unit Only

### Retz Regulator Tool

This unique universal tool can adjust set points on most gas service regulators.

Part Number	Description
RA246	Universal Regulator Adjustment Tool

### Regulator Tester

Setting your regulators has never been easier. Standard plugs are drilled with #34 (50 CFH) orifice size, but other size and dual port options are available upon request.

Part Number	Description
RT1A	Used with 1A LT Meter Connection Spud
RT20	Used with 20 LT Meter Connection Spud
RT30	Used with 30 LT Meter Connection Spud
RT45	Used with 45 LT Meter Connection Spud

\* gauge / quick disconnect not included
